Apply filters to SQL queries

Project description

This project was done in order to practice my SQL skills, and refine them. Navigating databases is time consuming, but with proper knowledge of SQL - the tasks become much easier. SQL is a powerful and simple language.

Retrieve after hours failed login attempts

```
MariaDB [organization]> SELECT *
    -> FROM log_in_attempts
    -> WHERE login_time > '18:00:00' AND success = 0;
+----------+----------+------------+------------+---------+-----------------+---------+
| event_id | username | login_date | login_time | country | ip_address      | success |
+----------+----------+------------+------------+---------+-----------------+---------+

+----------+----------+------------+------------+---------+-----------------+---------+
19 rows in set (0.093 sec)
```

This query selects all from “log_in_attempts” and filters it by attempts after 18:00 and attempts that failed. The AND command specifies that both conditions (the dates) must be met simultaneously.

Retrieve login attempts on specific dates

```
MariaDB [organization]> SELECT *
    -> FROM log_in_attempts
    -> WHERE login_date BETWEEN '2022-05-08' AND '2022-05-09';
+----------+----------+------------+------------+---------+-----------------+---------+
| event_id | username | login_date | login_time | country | ip_address      | success |
+----------+----------+------------+------------+---------+-----------------+---------+

```

This query shows login attempts between two dates. The WHERE command specifies where the query is looking at. The BETWEEN command specifies which two dates I wanted to query about.

Retrieve login attempts outside of Mexico

```
MariaDB [organization]> SELECT *
    -> FROM log_in_attempts
    -> WHERE NOT country = "Mexico";
+----------+----------+------------+------------+---------+-----------------+---------+
| event_id | username | login_date | login_time | country | ip_address      | success |

```

This query shows all login attempts made from countries other than Mexico. The NOT command prevents Mexico from appearing in the results.

Retrieve employees in Marketing

```
MariaDB [organization]> SELECT *
    -> FROM employees
    -> WHERE department = 'Marketing' AND office LIKE 'East%';
+-------------+-------------+----------+------------+----------+
| employee_id | device_id   | username | department | office   |
+-------------+-------------+----------+------------+----------+
|        1000 | a320b137c219 | elarson  | Marketing  | East-170 |
|        1052 | a192b174c940 | jdarosa  | Marketing  | East-195 |
|        1075 | x573y883z772 | fbautist | Marketing  | East-267 |
|        1088 | k8651965m233 | rgosh    | Marketing  | East-157 |
|        1103 | NULL         | randerss | Marketing  | East-460 |
|        1156 | a184b775c707 | dellery  | Marketing  | East-417 |
|        1163 | h679i515j339 | cwilliam | Marketing  | East-216 |
+-------------+-------------+----------+------------+----------+
7 rows in set (0.001 sec)
```

This query returns all employees within both the Marketing department and offices in the East building. The LIKE command lets you search for words that have the initial letters you put in. So in this example, all offices with the prefix “East” will show up.

Retrieve employees in Finance or Sales

```
MariaDB [organization]> SELECT * FROM employees
    -> WHERE department = 'Sales' OR department = 'Finance';
+-------------+-------------+----------+------------+-------------+
| employee_id | device_id   | username | department | office      |

|        1066 | o678p794q957 | ttyrell  | Sales      | Central-444 |
```

This query returns all results from employees that are in either the Sales or Finance departments. The OR command allows you to search for multiple conditions, and either can be met.

Retrieve all employees not in IT

```
MariaDB [organization]> SELECT * FROM employees
    -> WHERE NOT department = 'Information Technology';

```

This query returns all results for employees who are not in the IT department.

Summary

From this practice exercise, I was able to further develop my confidence in using SQL. Navigating, modifying, and accessing data within a large database can be daunting. But with SQL, I am confident that I will be able to succeed when dealing with databases.
