September 2015 - May 2019

Studied math, science, literature, and philosophy.

PROJECTS

Home Lab Setup: Configured a secure home lab environment to practice network security, & set up a personal file server. (Wazuh, NextCloud)

Incident Response Tool: Created an automated tool, CerberusIR w/ Python.

Risk/Vulnerability Assessments: Completed practice risk and vulnerability assessments using industry standard frameworks (NIST CSF, NIST SP 800-30, PASTA).

VM Simulated Attack/Defense: Set up attack/defense VMs to practice, along with Wazuh on a third VM to monitor security incidents.

CERTIFICATIONS

ISC2 Certified in
Cybersecurity

Google Cybersecurity
Professional Certificate

CompTIA Security+ (in
progress)

SKILLS

Risk assessment (NIST-CSF)

Operating systems &
infrastructure (Linux,
Windows, MacOS)

Python & Bash for automating
security workflows

SQL querying for data analysis

Server configuration (Wazuh)

Malware analysis

Endpoint security
configuration

Network security monitoring
(Wireshark, tcpdump)

Vulnerability scanning
(Nessus, Nmap)

Log aggregation &
SIEM-based event correlation

Concise and clear
documentation

LANGUAGES

Russian (fluent)

Spanish (advanced)
